

GLOBAL MARINE SERVICES LTD.

Marine Safety | Motor Rewinding
Fire Protection Fabrication | Marine Procurement.

Thank you for 40 years of trust and partnership.

Your continued support has driven our commitment to delivering reliable, innovative, and high-quality marine safety solutions. From offshore operations to port-side services, safeguarding lives and assets has always been our priority.

Here's to many more years of shared success and advancing excellence in marine safety.

About Us

Founded in **1985**, Global Marine Services Limited has spent **40 years building a legacy of innovation, excellence, and uncompromising safety in the marine industry.** Headquartered in **Nigeria**, we have grown into a trusted leader delivering specialized solutions across Africa and beyond in the oil & gas, renewable energy, and maritime sectors.

Our expertise spans across **Maritime and Offshore Safety, Fire Suppression, and Electric Motor Rewinding/Alternator Overhauling, supported by a wide range of electromechanical services.** For four decades, we've set industry standards by combining advanced technology, strict safety practices, and sustainable solutions. Our mission remains clear - to empower clients with reliable, innovative, and tailored services that ensure safe and successful operations in the most demanding marine environments.

vision

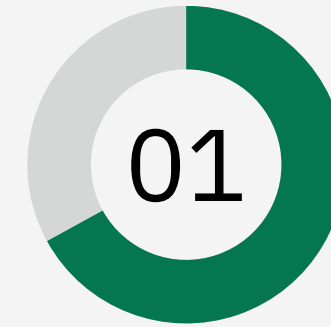

To be the global leader in integrated offshore and maritime safety and electro-mechanical services, driving industry standards through cutting-edge technology, sustainable practices, and an unwavering commitment to safety and reliability.

To deliver world-class offshore and maritime safety solutions alongside innovative electro-mechanical services, ensuring operational excellence, environmental stewardship, and the protection of lives and assets globally.

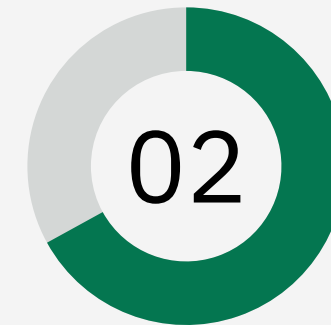

mission

CORE VALUES

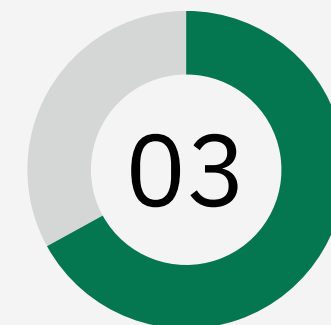

We operate with a safety-first mindset, driven by innovation, integrity, teamwork, and a customer centric approach. These principles guide every decision we make, ensuring reliable services, ethical practices, collaborative solutions, and exceptional client experiences across all maritime and offshore operations.

Safety First: We protect personnel, assets, and the environment through strict regulatory compliance and proactive risk management in every operation.

Innovation: We use advanced technology and creative solutions to improve efficiency, reliability, and sustainability in offshore operations.

Customer-Centricity: We provide tailored, high-quality services that exceed expectations and build long term, reliable partnerships.

Our Capabilities

Marine & Offshore Safety Equipment

We deliver advanced offshore and maritime safety solutions that protect personnel, vessels, and infrastructure.

Marine & Offshore Fire Protection

Our solutions safeguard vessels, crew, and onboard infrastructure with top-tier standards.

Marine & Offshore Pump Solutions

We handle the supply, overhaul, calibration, and repair of all pump and valve systems.

Our Capabilities

Marine & Offshore Electrical Services

From motor rewinding to alternator overhauling, we deliver precise electrical solutions.

Marine & Offshore Vessel Support

We serve merchant, offshore, naval, fishing, and specialized vessels with full technical support.

Infrastructure & Workshop Facilities

- Fully equipped service workshops with calibration benches and testing stations
- Mobile service teams for onboard inspection and certification at ports & anchorages
- Dedicated fire system and pump test bays
- Extensive OEM spare parts inventory, ensuring quick turnaround
- ISO-driven documentation and traceability system

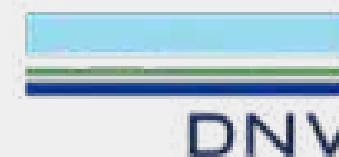

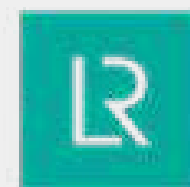

Maritime Safety Classifications

These standards ensure vessels, offshore platforms, and safety systems remain fully compliant with global regulations.

SOLAS sets the foundation for our safety services, covering life-saving appliances, fire protection, and emergency systems.

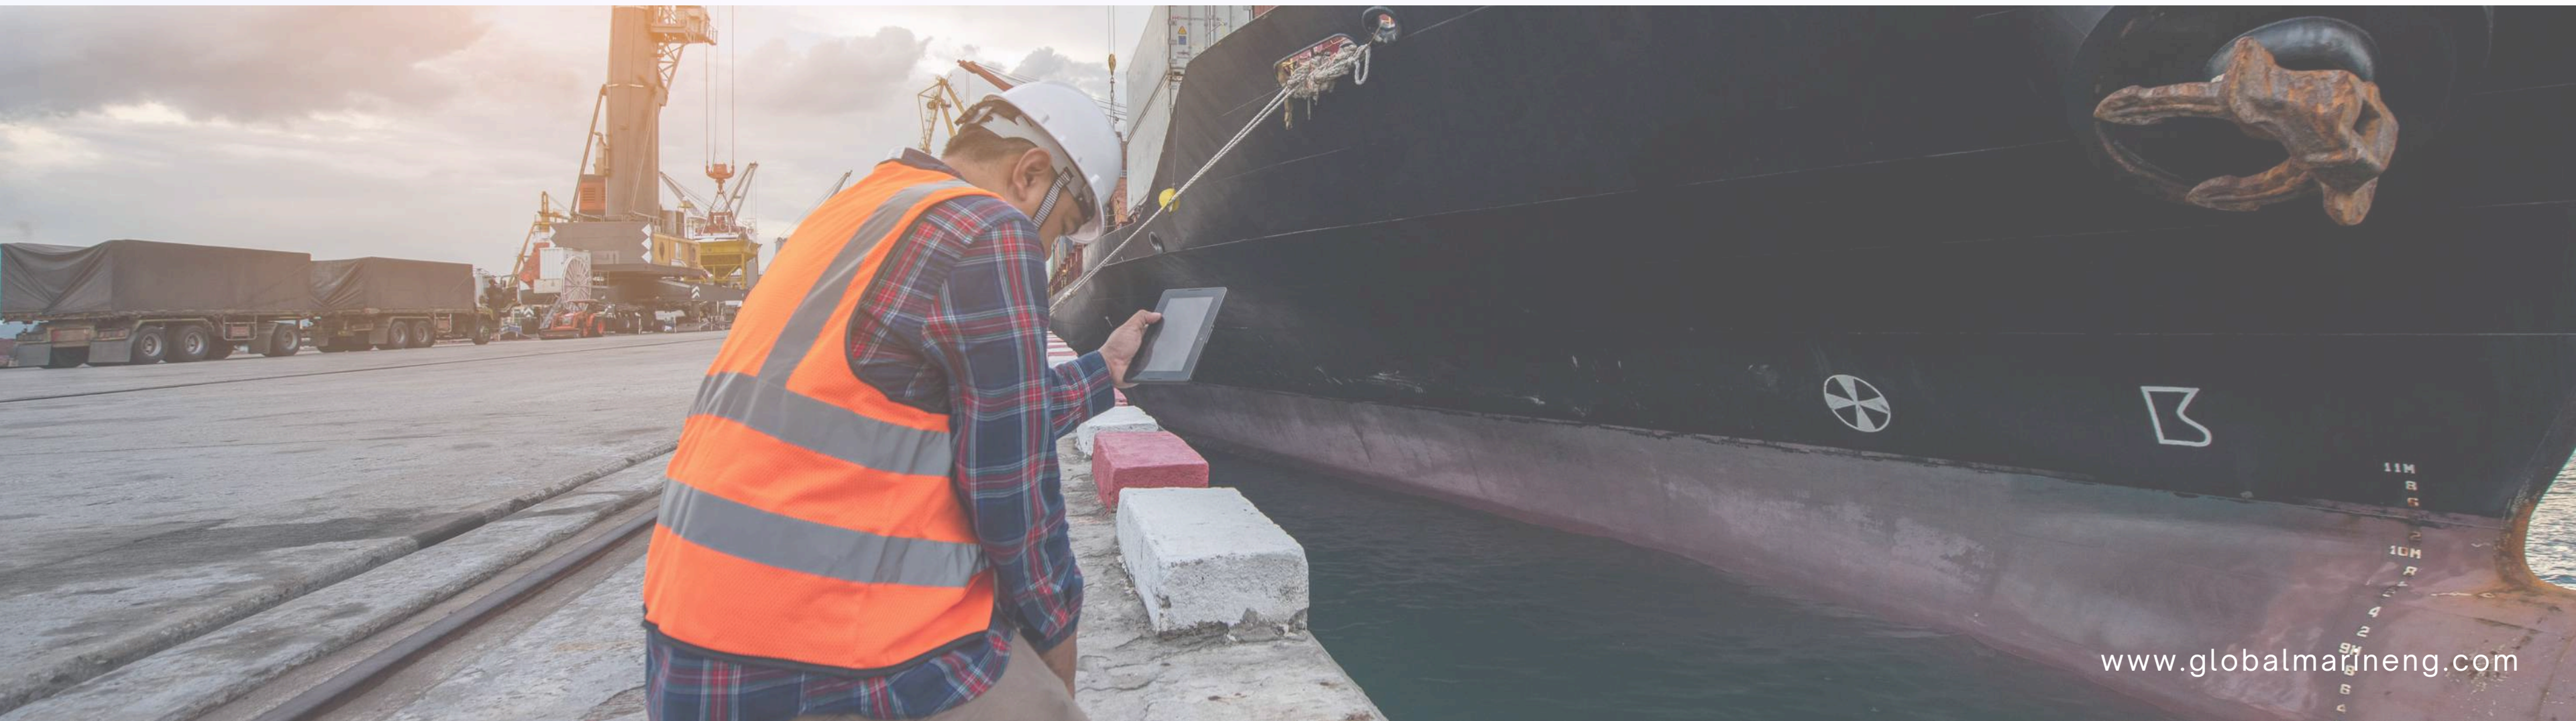

Classification Society Certifications confirm that vessels and equipment meet strict technical and safety requirements, and GMSL holds multiple class approvals.

Servicing Life-Saving Equipment

From lifeboats and life rafts to EEBDs and immersion suits, we ensure every asset is inspection-ready and emergency-reliable. With a focus on innovation, compliance, and dependability, we support clients in the oil & gas, renewable energy, and maritime sectors to operate with complete confidence.

WHY CHOOSE GLOBAL MARINE SERVICES LIMITED?

We deliver certified expertise through IMO, SOLAS Compliant and manufacturer-trained technicians supported by DNV, ABS, and Lloyd's approvals. Our advanced facilities and smart safety innovations-like IoT monitoring and GPS tracking - ensure reliable, modern solutions. With eco-conscious practices, tailored maintenance plans, and 24/7 support, we keep your operations compliant, efficient, and always emergency-ready.

ELECTRO-MECHANICAL SERVICES

Global Marine Services Ltd delivers comprehensive electro-mechanical solutions for marine, offshore, and industrial sectors, ensuring reliability, safety, and uninterrupted operations.

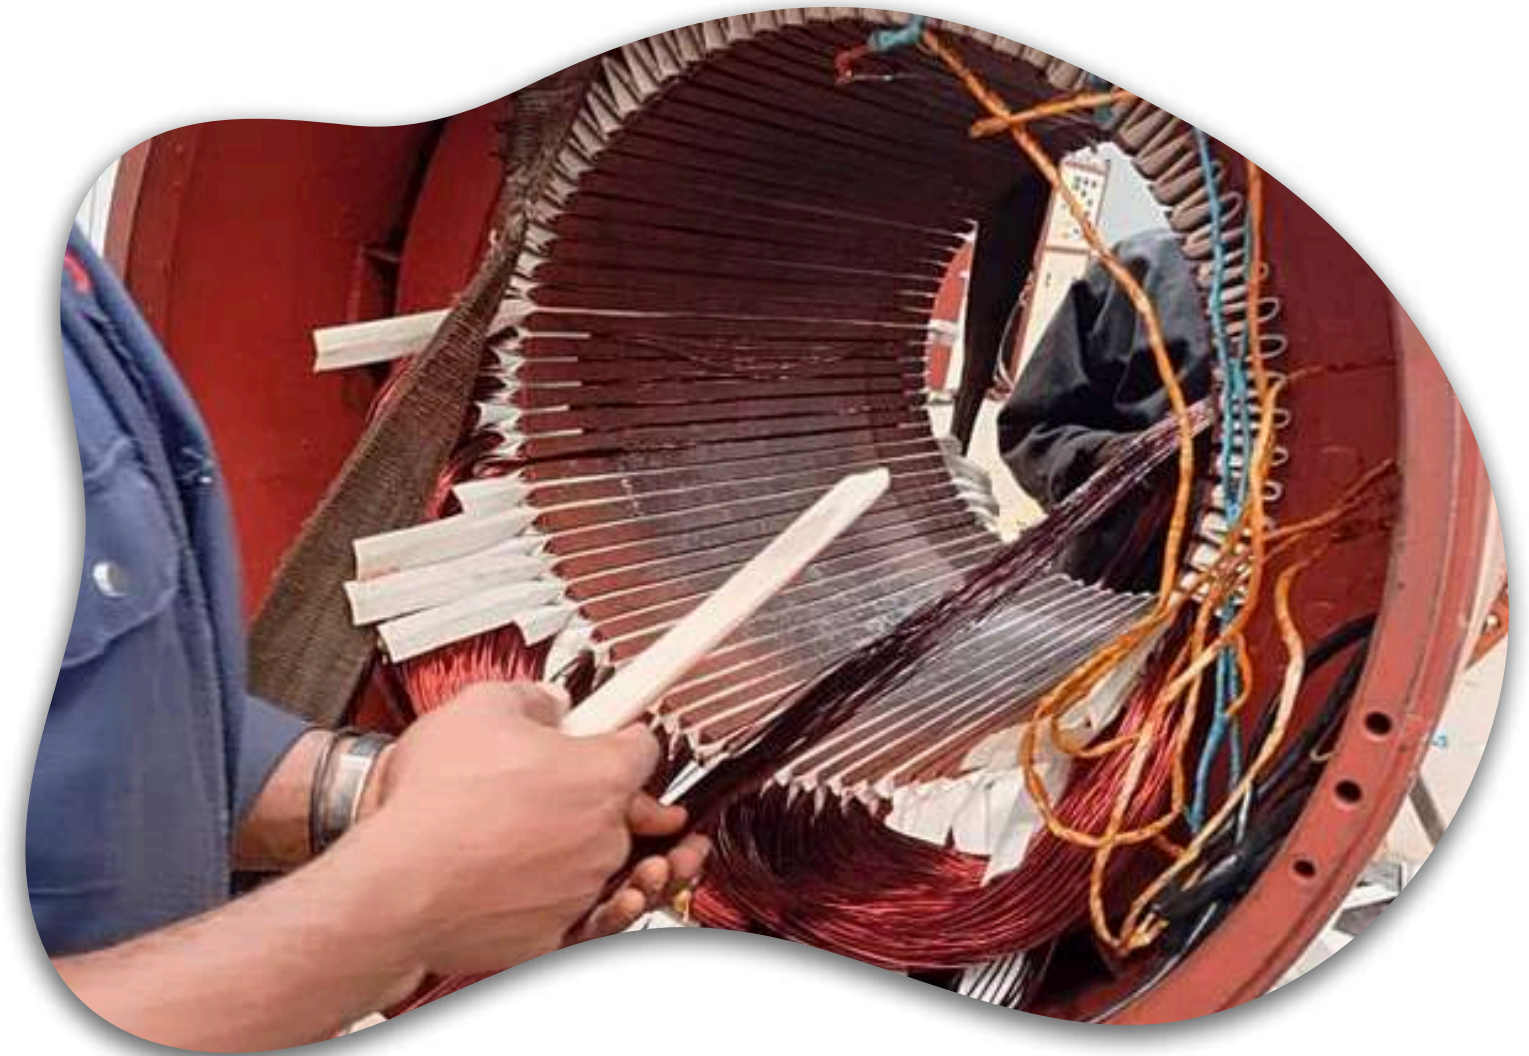

Our services cover the full lifecycle of critical electrical equipment - from diagnostics and rewinding to complete overhauls and performance restoration.

Electrical Rewinding & Overhauls (AC/DC | Alternators | Transformers)

We provide rewinding and complete overhaul services for all capacities of AC/DC motors, as well as generating set alternators and shaft alternators. Our work includes replacing damaged windings, restoring efficiency, and performing full mechanical inspections, cleaning, and repairs to ensure reliable performance onshore and offshore.

We also handle rewinding and repairs of HV and LV transformers, addressing issues such as burnt windings, insulation failures, and core faults. Our service ensures transformers operate safely, efficiently, and with restored voltage stability.

Transformer Testing

This service involves diagnostic testing to assess the condition and performance of transformers. Tests identify issues like insulation degradation, winding faults, or core problems before they lead to failure

Types of Tests:

- Insulation Resistance Test: Measures the integrity of insulation between windings and ground.
- Turns Ratio Test: Verifies the correct voltage transformation ratio.
- Power Factor Test: Assesses insulation condition by measuring dielectric losses.
- Oil Analysis: Evaluates transformer oil for moisture, acidity, or dissolved gases, indicating internal faults.
- Short-Circuit and Open-Circuit Tests: Determine losses and efficiency.

Onboard Pumps Repairing

Complete repair and overhaul of shipboard pumps of every kind, from centrifugal and reciprocating pumps to helical and screw type - deck machinery pumps. Services include troubleshooting, component renewal, alignment, testing, and full operational restoration.

Machining and Fabrication of Shafts, Couplings, Bushings, Sprockets, Pulleys

This service involves precision machining and fabrication of mechanical components such as propeller shafts, shaft couplings, bushings, sprockets, and pulleys. These components are critical for power transmission and motion control in machinery

Fabrication and Machining of Gears, Cutting of Gear Teeth, Internal/External Keyways

This service involves the design, fabrication, and machining of gears, including cutting gear teeth and keyways (slots for securing components to shafts).

Gears are critical for transmitting torque and motion in machinery

Generator Overhaul, Repairs, and Maintenance

We perform complete generator overhauling, covering all major engine and auxiliary components to ensure reliable and efficient operation.

Key systems we service include:

- **Fuel Injectors:** Cleaning, calibration, and replacement.
- **Cylinders & Heads:** Decarbonisation, liner checks, honing, and valve-seat inspection.
- **Fuel Pumps:** Overhaul, timing checks, and pressure testing.
- **Air Starting Valves:** Servicing and leak testing for smooth starts.
- **Operational Valves:** Gate, globe, check, and safety valves used across fuel, cooling-water, and lubrication systems.

Comprehensive Service Range

Covers electrical, mechanical, and safety systems, reducing the need for multiple contractors.

Cost-Effective Solutions

Repair and overhaul services extend equipment life, minimizing capital expenditure.

Precision and Quality

With a highly trained workforce and proven field expertise, we guarantee superior workmanship on every task. Our focus on quality ensures dependable results that shipowners can trust.
